About Bitcoin

Bitcoin is the most widely traded asset in the world, responsible for a significant share of the cryptocurrency sector. It was the first cryptocurrency to be made available to the general public, and as a result, it has the most mature infrastructure. In the cryptocurrency community, it is often regarded as a pioneer.

Market Cap

\$1,165,632,676,208

Circulating Supply

18,683,231 BTC

Market Dominance

52,97%

Projection

The fourth bitcoin halving is projected to happen in 2024, so we can foresee a price increase in 2025. Experts estimate that it will hit an all-time high of \$100,000, maybe even \$400,000, in the near future.
